

SIDUNN Retractable

Retractable MG Masterpact retrofit solution

Using the Santon retractable Merlin Gerin Masterpact retrofit solution, old or worn circuit breakers of various brands can be exchanged with a Merlin Gerin Masterpact NT or NW.

Retrofitting only requires the exchange of the circuit breaker.

This ensures that retrofitting is easy and can be realised without any rebuilding time involved.

- Retrofitting of various brands to Merlin Gerin
- Modern Masterpact NT and NW including many options i.e. settings and readings
- Professionally set up
- Many completed installations

Santon is a specialist in the field of circuit breakers and rebuilding or exchanging old circuit breakers. Santon and Schneider Electric have been partners for many years. The partnership consists of selling and delivering new breakers which could include the setting, adjustment and certification of the circuit breakers. Santon can supply most Sidunn conversion sets, including Masterpact from stock. If a set is not in stock, it will generally only take some days to deliver.

The new Merlin Gerin Masterpacts NW and NT are modern circuit-breakers and include the following features:

- measurement / display of harmonic contamination
- measurement / display of maximum power, capacity, blind capacity, etc.
- trip history
- waveform capture
- display of maintenance situation
- bush connection with the web server

With the Merlin Gerin Masterpact you will have a better insight in the quantity and quality of the electrical energy used.

Finally, the advantages of Sidunn retractable at a glance:

- **Rebuilding of various brands to Merlin Gerin**
- **Installation does not need to be switched off**
- **No rebuilding time**
- **Important technical improvement with low investment.**
- **Important increase of the life-cycle of the distribution system.**
- **User-friendly and safe solution.**

Santon has developed retractable conversion sets using the new Merlin Gerin Masterpact circuit breakers, which replace old circuit breakers in existing distribution systems. These SOLUTIONS are well suited if an old circuit breaker needs to be exchanged quickly and the installation can not be (easily) switched off.

By means of the Sidunn retrofit set or conversion set, the existing set can be replaced - in a matter of minutes, and without switching off the installation -, by a Merlin Gerin Masterpact, with which you immediately have the best quality circuit breaker at your disposal. Santon can arrange professional certified setting of the breakers using our in-house state of the art test equipment.
