Door Control Switches
Vandalism proof Shock and vibration proof Conductor key operated

Cab Light and Spot Cooling Control Switch Units
Stainless steel indication plate

Shunt Control Switches
Multi pole switches

Linear Direction Switch
30 poles, prewired connector

Master Control Switch
Key Lock, > 60 poles, 200.000 operations

Push to Turn Switches
LED position indication Multi pole switches

- AC and DC current from 16A up to 1000A and up to 1000V
- Shock and vibration resistant
- Suitable for switching low current control signals (due to self cleaning contacts)
- Many switch schemes possible due to the modular build up of the switch
- Standard ranges of GRP housings IP55 - IP69 available
- Standard ranges of stainless steel, mild steel and cast steel enclosures

- On request fitted with signal lamps, key locks, padlocking possibilities, etc.
- Optionally EMC tight enclosures
- For Tunnels: Heat resistant up to 400°C/2h
- Custom built assemblies
- References in public transport and tunnel building industry
